

GAIN COMPARISON: SSP58F, SSP18F & HELICAL (STANDARD "RUBBER DUCK")

NOTES:

- 1) The gains of the antenna's are shown in comparison when tuned to 170MHz
- 1) The SSP58F has the best overall gain followed by the SSP18F
- 2) The SSP18F has little gain outside of the bandwidth limits. Therefore, specifying center frequency is extremely important for customer satisfaction.
